

Mr. Arvind Mali

Introduction

WELCOME TO A.S. SOLUTIONS

We are pleased to introduce ourselves as the company for providing Service solutions for Flame and Gas detection for your Plant & Facilities . A comprehensive range of service options is available to meet the needs of a large and varied range of customer requirements.

All monitoring instrumentation and safety devices need regular maintenance and calibration to ensure that they are in full operating condition.

Introduction

We offer full service and repair facilities at our company premises and customer sites for our full range of fixed and portable Gas detection equipment.

A.S Solutions also has pioneered expertise for Design State of the Art F & G System with latest Instrumentation Technology.

Introduction

A.S.Solutions is a company specializing in Gas and Fire Detection system.

The team has an overall experience of 5 years in providing service, supply, calibration of all types of gas detectors, AMC (Annual Maintenance Services), Commissioning and Installation of Indian industries. We provide engineered safety solutions to following market segment.

Advantages

Advantage for Gas detection users; they can now choose to outsource part or all of Service & Maintenance function in order to reduce fixed costs and at the same time ensure that people with specialist knowledge of the equipment are involved in it. We are committed !! through contractual agreements, to have this type of equipment in use and regularly maintained. Gas detection and its associated costs constitute a significant investment by the user. Like any other capital investment, routine maintenance is essential to ensure optimum performance, reliability and extended operational life.
